By SIR PHILIP GIBBS.

London, July 23.—For the first time since the armistice after the great war, with its false promises of universal peace and himan progress, the heavy clouds of pessimism are lifting from the spirit of those who were beginning to despair of their own deals. The idealists are becoming justified among those who jeered at them. In every country that I know, including the United States, there were groups of intellectuals and plain folk of good will who believed that out of the awful lesson of the last war some new wisdom ought to come to safeguard humanity from another massacre of that kind by means of some new code of international justice, by an association of free peoples and by the gradual demobilization of armies and harteds.

They believed that the immense ruin created by the war could only be regaired by economic cooperation among the nations dependent upon one another, and they looked forward to leadership which would give a new call to mankind for the fulfillment of these wards and the second and the sound contents and smog the nations dependent upon one another, and they looked forward to leadership which would give a new call to mankind for the fulfillment of these wards and the second and the sound contents. The profilement is pressure and intellectual profilement is profilement and harteds.

It is the first touch of the world's new springtime. It is the breginning of a new chapter in history, when the common sense of mankind turns back the black page and starts on a clean sheet, which soon, alas, may be blotted and dogeared, but which is now ready for new records.

Taxation in Ireland will have to be saic way, the politicians could no opinion and saw that they must either yield a bit or lose their jobs. My experience with politicians has been that they always prefer to yield, though sometimes they delay too long. Fortunately also for the world, there are two men who are greater tran politicians afraid of losing their jobs. In both cases, indeed, their jobs are assured. One is President Harding and the other is Kins George, both of whom have given a lead to the world and have fulfilled the mass feeling of great peoples.

### Mayor Admitted to U.S. as 'Half of One Person'

WASHINGTON, July 23.—
Secretary Davis admitted the Mayor of Monrovia, Liberia, into the United States this month in spite of the fact that during July only one-half of one person may enter from that country under percentage immigration restriction law.

President Harding has the same responsibility, at least for his term of office, though he is more open to attack. What is amusing and instructive to the detached onlooker in England is the way her politicians are now claiming almost divine inspiration in the policy of peace. For two and a half years all Liberal opinion urged them to do the very things they are now claiming to be their own special revelation. More than two and a half years ago they were told that the offer but levels ago they were told that the offer but levels ago they were told that the offer but levels of the commended to Secretary Davis that, no provision being made for several years, will be received with a shout of "We were betrayed," which, indeed, has aiready been uttered. simple and easy and the only way of ciples. The greatest trouble of all is safety in the face of the tremendous not between England and Ireland but between Catholic Ireland and Protestant Ireland. There must be sacrifices in pride and prejudice from each side in this triangular argument, and there are many who want sacrifices from the other two parties without budging from their own position.

English pride is willing to abase it-self and has, indeed, abased itself to an open confession of the failure of its policy in Ireland, of age long errors and misunderstandings, and of things done by officials and forces which do not belong to our code of honor, justice and liberty. It is a pretty con-siderable sacrifice for a powerful and proud people to admit all that, and I oubt whether many other peoples in the world would have been

End of Chances for Vocational Training Started Move.

Special Despatch to The New York Herald. New York Herald Bureau. Washington, D. C., July 23. The withdrawal of the invitation by the military authorities to enlisted men in the army to apply for discharge is due to the fact that the army is losing its beet class of men.

Technical experts and non-commissioned officers are making frantic effect forts to get out of the service to accept better positions in private life. The army is losing a class of ambitious men who went into the army to obtain a vocational education. At the same time that Congress reduced the army it cut off appropriations for vocational training. The result has been a decrease of opportunities in this direction for enlisted men.

The rapidity with which the army was increased during the former Administration was due almost entirely to the opportunities for education and vocational training which were offered by the War Department. With these largely discontinued young men of the more desirable class are anxious to get out.
